

Modernization Rail Freight Infrastructure, Intralogistics, Freight Traffic and Transport Technology

Advisory, B2B Liaison, Technology Transfer, Pilot Projects, Business Mediation

In the field of rail freight transport and intralogistics, our support goes to decision-makers of rail transport services, logistic providers, engineering firms, companies in infrastructure construction, project sponsors, general contractors, economic development banks, as well as private and public contracting authorities (PPPs), working in close collaboration with leading companies active in international rail freight transportation and logistics. The services we contribute to projects are dedicated to supporting local decision-makers, responsible for project financing, engineering, construction, procurement, and technology transfer. Particular attention is given to the subject areas of rail transportation safety, digitization, robotics, automation, supply chain management, and rail fleet maintenance. Specialized expertise provided is focused on the realization of successful project implementations between B2B project consortia partners. The modernization of rail freight transportation processes can be supported through innovation pilot projects, to be achieved on time, and within set budgets. Provided service formats can be i.a.:

- ❖ Pre-Feasibility, Feasibility and Advanced Studies, Project Planning and Coordination
- ❖ Accompaniment of Pilot Projects, Technology Transfer and Licensing Processes
- ❖ Liaison between B2B Partners, Decision Makers, Project Sponsors, Event Support
- ❖ Advisory, Business Mediation Services, ADR, Communication Services

Rail Freight Transportation, System Digitization, Machine Building

To accelerate collaboration between international B2B Partners, we support technology suppliers and system developers active in digitization, rail technology, and machine building in market cultivation processes. Our support, including introduction and follow-up, goes to, e.g., CEOs, CTOs, Company Owners, and Strategic Investors presenting at international B2B Investor and Technology Showcase Events to Decision-Making Bodies, active in the modernization of rail freight transport, aligned to the requirements of the 21st century.
