

MEDSTERN CANADA LLP – NOW HIRING – DRUMMER AUDITION CALL!

At MEDSTERN CANADA LLP, Vancouver, BC, we support our Clients and B2B Partners in Western Canada in infrastructure development projects of varying size and complexity. We assist in realizing ambitious objectives in infrastructure modernization and achieving supply chain integration.

GEOTECHNICAL LIAISON MANAGER

The purpose of your role is to provide an interface to the community of infrastructure development professionals, project managers, engineers, and industry representatives, including construction companies, geotechnical consultancies, general contractors, financiers, and policymakers involved in public-private partnerships (P3s).

Your Skills & Competences:

- ❖ Empathetic, Analytical, Articulate, and Service-oriented Networker, Project Coordinator, Technical Liaison Officer
- ❖ Understanding of principal soil and rock strata encountered in Western Canada, BC, AB, SK, and MB, good in report writing
- ❖ Energetic Professional with Integrity, Detail, and Excellence Orientation, adaptable to different project consortia, teams
- ❖ Connections within the Western Canadian Infrastructure Development sectors, including Rail Transportation, P3s, etc.
- ❖ Understanding of regulatory requirements, industry standards, and policies, capable of providing compliance support

Your Responsibilities are:

- ❖ Build and maintain relationships with clients and industry professionals involved in infrastructure projects throughout each project
- ❖ Support geological site investigations, e.g., field mapping, geophysical examinations, field tests, lab analysis, rock classification
- ❖ Investigate, monitor, and assess geological hazards, conditions of structures, environmentally sensitive features, soil, rock, groundwater
- ❖ Interpret, translate, and proofread geological data, drawings, plans, AI models, materials analysis, and calculations in Canadian English
- ❖ Support expert examination reports, assessments, including 2D, 3D models, digital soil mapping, technical standards conversion

Minimum Qualifications:

- ❖ Master Geotechnical Engineer, MSc in Soil or Rock Mechanics, Chartered Geologist
- ❖ Qualifications in either Geology, Geophysics, Geotechnology, Mineral and Mining Engineering
- ❖ Accumulated project coordination experience in, e.g., rail transport infrastructure, resource sector, P3s
- ❖ Accreditation by a Canadian Geological Society, Association, Institution of Civil Engineers, Geoengineers

Based in Vancouver, you'll serve clients located primarily in Western Canada by supporting the transfer of geotechnical expertise to construct and modernize 21st-century rail transport infrastructure, including railway tunnels, tracks, terminals, warehouses, intralogistics hubs, and trading ports.

Even if you don't meet all the requirements for this role, we still want to hear from you! We are also searching for a **COMMUNICATIONS MANAGER** and **B2B LOGISTICS COORDINATOR** as new members for our MEDSTERN CANADA LLP Big Band! If you apply for our geotechnical Drummer Position, please send your cover version of one of the following songs in .mp3 format to medsterncanadalp@proton.com. Thanks!
